CM-1000

**Preparation for taking pictures**

- **Do not leave CM-1000 near sources of heat such as heaters. Do not heat CM-1000 or throw it into a fire. Doing so may cause burning or ignition of the built-in battery.**
- **Do not deform, modify, or disassemble CM-1000. Do not use the built-in battery for other than intended purposes. Doing so may cause overheating, burning, or ignition of the built-in battery.**
- **The operating temperature ranges for the battery are given below. Do not use the battery in temperatures outside these ranges, if the battery is used or stored in temperatures outside these ranges, fire, injury or problems with operation may occur.**
  - In use: -10°C ~ 45°C
  - In storage: -20°C ~ 60°C
- **Store it in a safe place out of the reach of children and infants. Infants may swallow the memory card accidentally as it is small.**

**Taking pictures**

- **Switching the power on and off**
  - Pressing the MODE button once turns on the camera with two beeps. At that time, the two lamps turn on.
  - Holding down the REC button turns off the camera with four beeps.
  - **When the camera is turned on, the two lamps at the center of the camera light up for about 2 seconds.**
  - **The left lamp indicates the battery level and the right lamp indicates the remaining capacity of the SD card.**

**Recording video**

- **Pressing the REC button once starts video recording with two beeps.**
- **Pressing the REC button again stops video recording with five beeps.**
- **If the REC button is pressed without an SD card, a series of warning beeps sounds to indicate that an SD card is missing.**

**Switching between the recording modes**

- **Turn on the camera and press the MODE button to change the recording mode.**
  - Each time you press the MODE button, the recording mode changes in the order of Full HD, HD, WVGA, and Still Image.
  - **If the REC button is pressed without an SD card, a series of warning beeps sounds to indicate that an SD card is missing.**

**Resetting the camera**

- **If the camera does not respond to any operations, it may have frozen. Press and hold both the MODE and REC buttons (8 seconds or longer) to reset the main unit.**

**Connecting to a smartphone**

- **Turn on the Wi-Fi connection and press the smartphone's home button to establish the connection. After the connection is established, start the smartphone application.**

**Smartphone settings**

- **Turn on Wi-Fi in your smartphone and select the network "SHIMANO Cam.xxx".**
- **Enter "SHIMANO_Cam" for the Wi-Fi password to establish the connection. After the connection is established, start the smartphone application.**

**About software updates**

- Use the software update feature to ensure your camera is up to date. For details, check the "UPDATE" section of our support website (http://www.shimano-sportcamera.com).
